

BUSINESS CASE

Student Number: 10483385

Student Name: Andiswa Amahle Bhengu

AFRO-FACIAL SKINCARE

Natural sun-kissed glow.

1. Organisation Overview

Organisation Name: Afro-Facial Skincare

Organisation history:

Afro-Facial Skincare is a skincare service brand that focuses on providing specialised facial treatments designed for melanin-rich and African textured skin. The business aims to address common skin concerns, such as hyperpigmentation, acne, dryness, and uneven skin tone, through professional facial treatments and personalized skincare consultations. The brand also plans to offer professional beauty workspaces for skincare specialists and beauty therapists.

Mission Statement:

Afro-facial Skincare's main mission is to provide high-quality skincare treatments tailored specifically for melanin-rich skin so that African people can feel confident in their beautiful melanated skin while also empowering beauty professionals through access to professional workspace facilities.

Vision statement:

To become a trusted skincare and beauty studio known for improving skin health and supporting beauty professionals in the community.

Target Audiences:

1. Individuals with melanin-rich skin seeking facial treatments
2. Young adults and professionals concerned with skincare

3. Beauty professionals looking for workspace rental
4. Clients interested in personalised skincare consultations

2. Website Goals and Objectives

The Afro-Facial Skincare website aims to promote facial products and services, attract customers, and support business growth.

Website goals:

- Promote Facial beauty products
- Promote Afro Facial Skincare services
- Allow customers to book facial treatments online
- Provide information about skincare for melanin-rich skin
- Advertise workspace rentals for beauty professionals

Key performance indicators KPIs:

- Number of website visitors per month
- Number of online bookings
- Positive testimonials from customers
- Workspace rental requests

3. Current Website Analysis

Currently, the Afro-Facial Skincare brand does not have an existing website.

However, creating a website will allow the business to establish an online presence, reach more customers, and provide convenient online booking.

Areas for improvement:

Since Afro-Facial Skincare does not have a current website, the main

focus will be on developing a website that clearly presents the brand

and its products and services.

4. Proposed Website Features and Functionality

Homepage

The homepage will introduce Afro-Facial Skincare and provide a brief overview

of the business. It will highlight the brand's focus on skincare treatments

designed for melanated skin and provide easy navigation to other pages on

website.

Services Page

The services page will list the facial treatments offered by Afro

Facial Skincare.

These services include:

- Acne control facial
- Skincare consultation
- Appointment bookings
- Dark Spot removal treatments

Images/Gallery Page

The gallery page will display images related to the business. These images include;

- Skincare products
- Beauty work space areas
- Face models
- Client skin before and after results

About Us Page

The About Us page will provide information about the business, including its

mission and vision. It will explain the purpose of Afro Facial Skincare and its

commitment to providing specialised facial treatments.

Contact Page

The contact page will provide important business information such as the

phone number, email address, and location of Afro Facial Skincare.

A contact

form may also be included so customers can send inquiries directly through

the website.

5. Design and User Experience

Colour Scheme

- Brown (melanated skin tones)
- Peach
- Gold (luxury and quality)
- Beige (clean and natural feel)

Typography

- Headings: Bold modern fonts with capital letters only
- Body text: Simple, readable fonts

Layout and Design

- Clean and minimal layout
- High-quality images of skincare treatments
- Clear navigation menu

- Mobile-friendly design

User Experience Considerations

- Easy navigation menu
- Clear service description
- Clear images
- Fast loading pages

6. Technical Requirements

Programming languages

- HTML
- CSS
- JavaScript
